

# Report – New playground equipment – multi-play unit

08 September 2023 (updated 13 October 2023)

## OVERVIEW

---

The Council is considering replacing the junior multi-play unit in the enclosed playground.

## OPTIONS

---

Council could replace the existing multi-play unit with a new one, or could choose a different piece of equipment.

## CONSIDERATIONS

---

- Space – the current fall zone area is greater than when this unit was installed.
- Height of unit and safety surfaces – if there is a critical fall height of over 1m a safety surface is required.
- Footprint – there is a relatively small footprint for a more challenging item
- Activities – what type of activity does the council want to include, eg climbing area, slide, pole
- What age range are we catering for? Eg 2+, 5+
- Cost of removal of existing unit

## MULTIPLAY OPTIONS

---

Options listed below are from Proludic, Sovereign and Creative Play as examples, as these companies provide pricing in their catalogues

### **Proludic**

(Data sheets on Dropbox)
