

Tree Planting Plan at Leaffield Playing Field – Recommendations by Sustainable Leaffield.

We have ordered 30 trees from The Woodland Trust and anticipate receiving 10 x rowan, 10 x flowering cherry and 10 x silver birch, although this is not guaranteed and the mix of trees and associated numbers could be different. We will take receipt of the trees by the end of November and they need to be planted by March at the latest.

1. 3-4 cherry / rowan.
Spaced 1 – 2 m apart.
Keeps them away from
any potential future
park or hard court
development.

3. 5-6 silver birch in
small semi-circle
cluster set back
from existing
benches

4. 1 x cherry in
space near to
skate park as a
feature tree.

2. 4 x silver birch planted
individually in the car
park hedgerows to
compliment existing
silver birches planted
there previously. Exact
positioning to be
agreed.

Two possible trees to be
planted by the preschool
within their existing hedgerow.
Consideration for trees to be
planted at the football pitch
halfway line in the future if the
existing ash tree there, that is
already tilting, has to come
down.
